

SHEDD AQUARIUM TRIP

SATURDAY, MAY 16, 2015

Docents, Volunteers and family members gathered for a day trip to the Shedd Aquarium in Chicago.

Attractions included the floor show, a movie with extra sensations (water spray, anyone?), touching stingrays, and many exhibits organized by theme.

Because we were PPZDVA the Shedd provided us with behind the scenes tours of their veterinary facilities, including labs, operating rooms (how do you anesthetize a fish?) and treatment areas.
